

A Report of Free Screening Camp on "Covid-19" Symptoms **22nd May 2021**

Corona virus is a kind of common virus that causes an infection to the nose, sinuses and upper throat. In early 2020, after December 2019 outbreak in china, the World Health Organization identified SARS-CoV-2 as a new type of corona virus. CoVid-19 is a disease caused by the same virus which affects upper respiratory tract and lower respiratory tract.

A free Camp on screening the patients for CoVid-19 symptoms was conducted on 22nd may 2021 at Hungund taluk. Camp began with Verbal Inauguration by Tahsildar of Hungund Smt. Shweta M. B.

Dr. Mahantesh Kadapatti, member BVVS Sangha, spoke few words regarding the CoVid-19 symptoms and also regarding the importance of primary screening of the patients to avoid complications in future.

A team of 11 members with 01 consultant, 06 PG scholar and 04 interns were deputed to the camp by Dr. M. M. Salimath, principal, from our college. This team was again divided into 05 different teams with two doctors in each team and one person from municipal corporation.

The taluka was divided into 23 different wards and each team was allocated with one separate ward. Each team visited every single house in the ward and screened every individual of the family above the age of 18 years for covid related symptoms and also for their oxygen saturation levels and pulse rate. During the camp, nearly 80 individuals were screened by each team from different wards.

Team deputed to the camp

Screening by Dr. Santosh Patange, Faculty

The Camp was successful with a positive feedback from patients and the organizers. It was a teamwork of Dr. M. M. Salimath - Principal, Dr. Santosh C. Patange - Faculty, PG Scholars and Interns of our college.
